Paraphrasing Chart

Paraphrasing means to put some text that you've read or heard into your own words.

Start with **Notes** where you write down information from the text - main ideas, facts, supporting evidence. In **My Paraphrase** column, write 2-3 sentences in which you explain the main ideas in your own words. In the **My Thoughts** section, write what these ideas make you think about - what feelings, predictions, or conclusions can you draw?
