

Secondary Define Step – English Transcript

Research begins with questions.

You can answer some questions quickly like, what is my final project, and when is it due?

Essential questions require more thinking. These will determine the direction of your research.

Spending time now defining clear essential questions and defining your topic until it is just right will save time later and make research easier.

To learn more about the *Define* step of research, check out the links in the *Learn to* box. Each *Learn to* link has its own *Resources* box with eBooks, tutorials, and more.
